More MakerSpace/STEAM Initiative products to come!

Learning Tablet powered by Nabi (with Wi-Fi)
COPPA compliant. Comes with over 35 learning apps and games, pre-K and K lessons. \$149.99

SmartPen Bundle - ESL
Bridge the gap between reading, speaking and listening for foreign language and English language students! Bring sound to paper with this award-winning digital SmartPen. ESL/ELL SmartPens promote differentiated, hands-on instruction using interactive technology. Students can read and listen to content in both English, and one of 40 other languages, by simply touching the pen to interactive books. \$299.95 (Includes pen, dictionary and four books in each bundle.)

Code-a-pillar
Code-a-pillar engages preschoolers to affect the world around them, teaching the basics of planning, sequencing, problem solving, reasoning, cause & effect, memory, discovery, fine motor skills, and critical thinking, fostering the early steps towards 21st century skills. \$54.99

Bloxels
Bloxels uniquely unlocks students' innate creativity by leveraging something they love: video games. Students create games and channel their creative potential as they gain greater understanding of design, logic, and computer science. May be used with our Wi-Fi compatible learning tablet. \$49.99

Dash and Dot
Introducing kids to robotics and coding, Dash and Dot is an adventure through a guided app experience that teaches several simple-to-learn, but relevant, code languages. Curriculum and lesson plans are available for MakerSpace, classrooms, and robotics competitions. \$219.95

Littlebits KORG Synth
LittleBits KORG Synth incorporates the science of sound, circuitry, engineering, music, sequencing, and analog synthesis, enabling amateur and professional musicians to easily explore the synthesizer instrument. Create instruments and musical craft projects. Includes a booklet of 10 projects (more available on-line) that help teach the science of sound waves and electronic music. \$174.95

Blocks Rock!
Supporting STEAM initiatives, Blocks Rock! Is a block building activity that promotes teamwork and quick thinking, as well as spatial thinking and mental rotation. A guided app is available for additional challenges. \$65.99

3D MOD-t Printer
The MOD-t is a cost effective, elegantly simple desktop 3D printer providing the highest quality and reliability. Inexpensive technology for today's library. \$349.95
